Thanks Pat,

I did see the first item.. but some how missed the second item. We also have a copy of the full hearing.

Sorry for missing you guys today.. I had another project big blowup.

Will reschedule for this week, are you available tomorrow at all? I know it wasn't great for buddy.

Subject: Pruitt on LIS Dredged Material Disposal

29. In 2005, New York State, Connecticut, and the EPA and Army Corps reached an agreement to eliminate or reduce the amount of dredged sediment dumped in the open waters of Long

Island Sound. The New York State Department of Environmental Conservation and Department of State have repeatedly urged the EPA and Army Corps not to move forward with the permanent designation of an open water dumping site in Eastern Long Island Sound, raising concerns that the sediment has not been properly tested and could negatively impact the economic and environmental state of Long Island Sound, which was designated in 1987 by Congress as an Estuary Of National Significance. Will you work to enforce NYS's right to protect Long Island Sound from additional open water dumping of dredged material?

The designation by EPA of an area as a site for dredged material disposal must follow the rigorous process set forth in the Marine Protection, Research, and Sanctuaries Act to ensure protection of the environment. As I stated in my testimony before the Committee, I support following the administrative processes set forth in law, including the National Environmental Policy Act, to ensure that EPA's statutory responsibilities are fully carried out.

30. Will you commit to assisting the states with determining upland alternatives to the open water disposal of dredged material?

Disposal of dredged material is not an EPA mission or responsibility. That lies with the Corps of Engineers.
